

**Here is what
residency
directors have
told us.**

Why is CoreCases Right for Your Residency Program?

- A core curriculum of 30 cases describing hundreds of Internal Medicine topics.
- Competencies and milestones mapped to the content within the cases (only program available that does that).
- The most sophisticated milestone tracking, assessing and reporting tool available so you can follow the progress and proficiency of your residents in real-time.
- Over 1000 multimedia elements including clinical images, procedural videos, communication skills videos, and hundreds of original medical illustrations.
- 400 questions in the form of a summative assessment.
- A journal club in every case attached to a private social network so your residents and faculty can have ongoing discussions about the cases and related topics (providing multiple educational touchpoints).
- Virtual experts on every screen to provide formative feedback and more in-depth information when your residents need it.
- Ongoing updates to keep the curriculum current.
- Free access for all of your faculty members so they can reinforce the education in their lectures and rounds with the residents.
- A learning management system so you can assign any case to any resident during any rotation.
- Implementation strategy team to help you tailor CoreCases and the reporting system to your program's needs.
