

Why CoreCases is Right for Your Institution.

- **Standardized and Consistent**
- **Objective Assessments**
- **Flexible and Efficient Education**
- **Complimentary to Existing Activities**

Additional New Cases:

- **Transgender Care**
- **Opioid Addiction**
- **Eating Disorders**
- **Well-being**

- A standardized curriculum of 60 “Virtual Patient Cases,” describes hundreds of OB/Gyn disease states. Every learner cycles through all topics for a consistent experience.
- Competencies and Milestones are mapped to the content within cases, providing an objective assessment of a learner’s proficiency in real-time with uploadable reports.
- Self-directed, content is minimal work for faculty; physician trainees have the flexibility and autonomy to access and re-access topics as needed to learn important skills
- Complimentary to existing activities and easy to implement. Our team helps tailor CoreCases to your needs (for individuals, group didactics, and flipped-classrooms).
- New cases in timely, but difficult to teach areas like transgender care, opioid addiction, and eating disorders.
- Now includes an “**Introduction to CoreWellness.**” Three well-being modules on burnout syndrome, resilience, and wellness, plus 2 real-life simulations help physician trainees cope with the unique demands of the healthcare profession.
- Keeps learners engaged with 1,500+ multimedia elements including procedural and communication skills videos, clinical images and original medical illustrations.
- Provides the latest in technology-enhanced education: “Virtual Experts” provide in-depth formative feedback when learners need it; a Journal Club article in every case promotes ongoing discussions that reinforce clinical decision-making.
- 600 board-style questions in the form of a summative assessment

CORECASES FOR OB/GYN CURRICULUM

No.	Disease State or Problem	Description of Presenting Complaint	PGY1	PGY2	PGY3	PGY4
R1001	Uterine Leiomyomas	47-year-old Caucasian female with worsening menorrhagia.	●			
R1002	Endometriosis	20-year-old African American female with worsening pelvic pain.	●			
R1003	Shoulder Dystocia	28-year-old G4P3 female with first prenatal visit at 28 weeks gestation.	●			
R1012	Menopause	48-year-old female with 6 months of irregular menses.	●			
R1016	Preterm Labor	23-year-old G1P0 at 26 and 5/7 weeks gestation who presents with mild cramping.	●			
R1017	Premature Rupture of Membranes	24-year-old G1P0 at 38 weeks gestation with leakage of clear fluid from her vagina.	●			
R1018	Post-term Pregnancy	19-year-old female G1P0 who presents with a complaint of decreased fetal movement.	●			
R1024	Postpartum Hemorrhage (atony)	34-year-old G2P1 who presents at 40+ weeks and has an arrest of labor at 6 cm.	●			
R1028	Dysmenorrhea	22-year-old female with painful menstrual cycles.	●			
R1036	Antepartum Care and Assessment	38-year-old Caucasian G2P0010 at 8 weeks 5 days presents with an episode of light bleeding.	●			
R1047	Induced Abortion	23-year-old G0 who presents after three weeks of light vaginal bleeding.	●			
R1048	Sexually Transmitted Infections	24-year-old G1P001 with vaginal discharge, spotting, and lower abdominal pain.	●			
R1053	Health Maintenance	59-year-old Caucasian G2P2002 is presenting for an annual exam.	●			
R1055	Obesity	46-year-old obese female with type 2 diabetes and suboptimal weight loss.	●			
R1058	Adult Immunization	61-year-old female with three days of shortness of breath.	●			
R1005	Preeclampsia-Eclampsia Syndrome	33-year-old African American female G3P0020 at 31 weeks with chronic hypertension.		●		
R1007	Amenorrhea	35-year-old G1P1001 presents with eight months of amenorrhea.		●		
R1019	Fetal Growth Abnormalities (IUGR)	26-year-old African American female at 32 3/7 weeks with new onset fetal growth restriction.		●		
R1021	Asthma in Pregnancy	23-year-old G1P0 at 33 weeks gestation presenting with progressive shortness of breath.		●		
R1022	Contraception and Sterilization	43-year-old G2P2 desires to start a new contraceptive method.		●		
R1033	Cervical Disease and Neoplasia (CIN)	32-year-old G1P1 with inter-menstrual spotting and watery vaginal discharge.		●		
R1038	Immediate Care of the Newborn	29-year-old G3P2 at 38+ weeks develops a non-reassuring fetal heart tracing during labor.		●		
R1039	Obstetrics Analgesia and Anesthesia	27-year-old Chinese female G1 presents to L&D at 38+ weeks in labor.		●		
R1042	Breech Presentation	33-year-old G4P3003 presents at 37 weeks and is found to measure large for dates.		●		
R1049	Chronic Pelvic Pain	42-year-old G2P2 Caucasian female presents with chronic pelvic pain.		●		
R1051	Sexual Assault	21-year-old G0P0 brought to ED by her friend after a sexual assault.		●		
R1052	Domestic Violence	28-year-old G1P0010 referred for pelvic pain that has been present for 18 months.		●		
R1054	Hypothyroidism	62-year-old female is seeing you today to discuss her lab results.		●		
R1057	Depression	42-year-old female presents with fatigue and sleep disturbance.		●		
R1004	Urinary Incontinence	31-year-old Caucasian female with increasing symptoms of urinary incontinence.			●	
R1006	Infertility	39-year-old Caucasian female with a three-year history of secondary infertility.			●	
R1008	Polycystic Ovarian Disease	22-year-old female presents with infrequent, irregular, heavy menses and facial/body hair.			●	
R1009	Ectopic Pregnancy	21-year-old Indian female with 6+ weeks amenorrhea and spotting.			●	
R1010	Abnormal Uterine Bleeding	38-year-old female with worsening menorrhagia and dysmenorrhea.			●	
R1014	Multifetal Gestation	38-year-old female at 27 weeks and 3 days with decreased fetal movement of one twin.			●	
R1015	Placental Abruption	24-year-old G2P1001 at 35+ weeks gestation with bleeding and decreased fetal movement.			●	
R1035	Preconception Care and Genetics	28-year-old G2P0020 presents for an annual exam with concerns about future pregnancies.			●	
R1045	Postpartum Fever/Infection	24-year-old G1P1 two days postpartum who presents with severe abdominal pain.			●	
R1046	Diabetes in Pregnancy	29-year-old G3P1011 female presents at 22 weeks to begin prenatal care.			●	
R1050	Disorders of the Breasts	37-year-old G0 female presents with a lump in her right breast.			●	
R1056	Constipation	67-year-old female with abdominal fullness and increasingly persistent constipation.			●	
R1059	End of Life Care	80-year-old Caucasian female with end-stage congestive heart failure.			●	
R1060	Anemia	74-year-old female is seeing you today to discuss her lab results.			●	
R1011	Congenital Anomalies	14-year-old G0P0 female who presents to the emergency room with abdominal pain.				●
R1013	Alloimmunization	28-year-old female presenting late for prenatal care and has abnormal ultrasound findings.				●
R1020	HIV in Pregnancy	27-year-old G3P0020 at 7 weeks by LMP presents to obstetrics with a persistent sore throat.				●
R1023	Pelvic Relaxation	62 year-old G3P3 complains of pelvic pressure and occasional vaginal spotting.				●
R1027	Puberty Abnormalities	16-year-old female who has not started menarche.				●
R1030	Gestational Trophoblastic Neoplasia	24-year-old G2P0010 at 11 weeks with severe nausea and vomiting.				●
R1031	Vulvar Neoplasms	45-year-old G2P2 with a 6-month history of vulvar pruritus and pain.				●
R1032	Endometrial Carcinoma	71-year-old Caucasian female G0 with 3 months of postmenopausal bleeding.				●
R1034	Ovarian Cancer	67-year-old female G1P1 presents to your office with 6 months of abdominal bloating.				●
R1040	Postpartum Pulmonary Embolism	39-year-old female 3 hours postpartum has shortness of breath and chest pain.				●
R1043	Recurrent Pregnancy Loss	36-year-old presents with primary infertility for 4 years and three pregnancy losses.				●
R1044	Postpartum Hemorrhage (Accreta)	29-year-old G2P1 with successful VBAC, but has a significant postpartum hemorrhage.				●
